NUMBER OF EMPLOYEES

STATEMENT BY FIRM Carpenter Associates has been providing engineering services on projects throughout the State of Maine since 1969. Our expertise is in the areas of full facility engineering for a diversified number of clients ranging from Architects, State, Cities, Towns, School Departments, Housing, and the Private Sector. Projects range from very small site review projects to large new complex construction or renovation projects. The firm provides feasibility studies, energy audits, multi-discipline design services, development of plans and specifications for a public bidding process, contract award, and construction management to successfully complete each project within budget.
